Year after year, these Gifts will be a reminder of your thoughtfulness.

NEWEST VARIETIES OF ENGLISH CHRYSANTHEMUMS

All the mums listed below were imported from a prominent nursery in England. This nursery specializes in raising mums for the Florist's trade and his standards are so high a plant must produce from ten to twelve ideal blooms of the highest quality, or be discarded. The pictures in this catalogue are actual pictures taken of his stock. He has been very considerate in releasing this stock for the American Public and we sincerely hope that all our customers are as successful raising these lovely mums as the nurseryman who released them to us.

\$1.00 Each. MUMS shipped May 1st to June 1st.

DAYLILIES (HEMEROCALLIS)

Floral enthusiasts have found that the *Hemerocallis* belongs in the garden, not to replace the spring bloom of Iris and Peonies or the fall blooms of the lovely *Chrysanthemum*, but to fill in that much needed mid-summer bloom. Day by day this beautiful flowers is becoming more and more in demand. Hardy from coast to coast and one that will thrive in any garden soil.

CULTURE OF DAYLILIES

TIME TO PLANT. Daylilies may be planted during the spring, summer and fall. Local conditions will govern the best time for planting, which should be done at a time when the plants will be able to establish themselves and begin prompt growth. Fall planting should be early enough to permit the plants to become well established before cold weather. Daylily roots are packed damp and should not be allowed to dry out.

PLANTING. In planting spread the roots naturally and cover about two inches with pulverized soil. The exact depth will depend on the size and type of the plant, but it is usually easy to tell from the color of the leaves the depth at which the plant has been growing. Too deep planting is injurious. Firm the soil so that roots and crown are in good contact with the soil. Water after planting if the ground is dry.

JUDGE ORR (Orr)—E. 30 inch. The outstanding soft orange-yellow blooming at Iris time. It is as far advanced over the old time, early blooming Daylilies as the modern Daylilies are over the old Flava. Prolific and free flowering; wonderful too as a cut flower. ----- **Each \$1.00**

JULY APRICOT (Bechtold)—A lovely, evenly toned flower of lustrous apricot. Petals ruffled and sepals recurved. Very floriferous and prolific. July-Aug. 30 in. ----- **Each. \$2.00**

J. S. GAYNER (Yeld) ML—38 in. In our opinion this fine variety epitomizes the qualities of a good Daylily. It certainly is the standard by which we judge other varieties. For color it is one of the finest light golden yellow shades for texture and substance as well as form it leaves little to be desired. For branching and poise of blooms it so far ahead of most varieties that it has been recommended and used widely by the plant breeders. ---- **Each \$1.00**

JUST MARY (Russell)—36 in. Red veins running through a yellow background with a deeper eye-zone. Keeps well evenings, heavy bloomer. **Ea. \$1.00**

KANSAN (H. M. Hill 1948)—Huge wide spreading red toned self with long slender, gently recurving segments that taper gradually. Buds are often 6 inches long and the spreading flower 9 inches. One customer wrote of a bloom that measured 11½ inches, 50 inch. **Ea. \$5.00**

KILLARNEY LASS (Nesmith)—L. 34 inch. Unquestionably the finest descendant of Fulva Dosea, it inherits from this breeding the pointed petals and star-like shaped blossoms. In color it is a bright pink and probably has less buff or yellow in it than any other variety we list. Very pretty and gives a pink effect in the garden.--- **Each \$3.00**

KIM (Schreiner 1950)—ML 38 in. For novelty of coloring the brown blooms of this personable Daylily are certainly most noteworthy. A result of crossing Black Falcon with Minnie, the smoothly colored, unveined blooms are a rich shade near cordovan-brown. A medium sized flower on a good stem with moderate branching. A novel, different Daylily. ----- **Each \$3.00**

KNIGHTHOOD (Schroeder 1948)—Deep maroon crimson, wonderfully rich in general tone it is a self, but the broad petals are tipped with yellow which delightfully accents the color. The petals also have a slight turned up brown edge, nicely ruffled. It is wide branched and carried many buds, 40 inch stem on first year plants. ----- **Each \$3.00**

LADY FAIR (Nesmith)—M. 38 in. This was the queen of the pinks as we bloomed them last year. A flesh pink with a creamy understone, we have enjoyed flowering this variety for several seasons and have never been disappointed in its delicate beauty. -- **Each \$4.00**

A SELECTED LIST OF TALL BEARDED IRIS

CULTURE

Tall Bearded Iris will give excellent results in any fertile soil with reasonable drainage and exposure to sunlight. Whether the soil is neutral, slightly acid or calcareous makes little or no difference. Plants should be set out so that the rootstock (rhizome) is barely underground. If soil is dry when planting is done a thorough soaking is beneficial but after the plants become established they require very little moisture after blooming. When the plants become too crowded or decrease in their flowering, division is likely necessary. Bearded iris will grow but not bloom properly in a shaded location.

(Shipment of Iris Starts July 1)

Name of variety is followed by the name of the originator and the year of introduction. Season of bloom is indicated by the initials E-M-L signifying early, mid-season, or late. Height is given in inches.

JAPANESE (IRIS Kaempferi)

CULTURE—Like most azaleas and rhododendrons these iris will not tolerate lime in any form. For best results heavily enriched soil and abundant moisture are necessary. After blooming they require no more moisture than other perennials. An ideal location is along the banks of a stream or pond. They are successfully grown in most parts of the country and do especially well in the Atlantic and Pacific states and the southern border of the Great Lakes. Plant so that the crowns are about 2 inches below the ground surface. Do not expect typical flowers until the second year as they take more time to become established than bearded iris. In dry climates we cannot stress too strongly the importance of constant moisture during their growing season. In fact if your water supply is unlimited select a location where you can flood the plants often and you will be rewarded with larger flowers. Any well rotted manure is the best fertilizer. If your soil is alkaline, the addition of aluminum sulphate, peat moss or oak leaf mold will produce the correct soil condition. If the leaves turn yellow, lime very likely is present and **LIME** is **FATAL** to these iris. Best planted in full sun except in warm sections of the country where afternoon shade will prove beneficial. Keep away from foundations, sidewalks, walls or

any place where lime can reach. Shipment Sept. 1st.

Mixed Varieties six for \$2.50 prepaid.

SIBERIAN IRIS

CULTURE—**SIBERIAN** and **SPURIA** **IRIS** will grow and bloom in almost any soil that suits other perennial flowers. However, they are moisture lovers and will grow twice as high and produce twice as many flowers if kept constantly moist during their growing season. As they are most effective in large clumps they should be planted where they need not be disturbed. All are very hardy and should give no trouble anywhere.

VIOLACEA—This richly colored Louisiana produces 5 inch blooms of glowing blue-purple. Hgt. 2 ft. ---- **Each \$0.75**

SPURIA IRIS

The *Spurias*, sometimes called "Butterfly Iris", resemble the Dutch irises which are extensively used by florists, but the flowers are large, and numerous blossoms are borne on the three to four foot stalks, making a very showy display in the garden, and are superb as cut flowers, as they are not as fragile as the bearded iris and keep for days. The color range is wide, ranging from near white and creamy-yellow to a deep golden yellow, and from lovely old-gold shades down to a deep golden brown. There are lavender-blues and true blues and a mixed planting is indeed a very beautiful sight. The browns are quite new and unusually interesting.

Spurias require very little care, and can be left in a permanent location, so should be given room in which to grow. They thrive in full sun or partial shade, and do best if kept well watered in the early spring and throughout the blooming season.

Keep very moist until established. Perfectly hardy, they are very worthwhile additions to any garden. *Spurias* bloom at the same time as the late flowering bearded iris.

Spurias will be shipped only in the fall at the proper planting time. In planting them be sure to cover rhizomes three to four inches.

AZURE DAWN (Nies)—A blue-lavender *Spuria* of uniform coloring, except for a pale yellow patch on the falls. The smoothness of the coloring is particularly pleasing. 4½ ft. ----- **\$1.00**

BRONZSPUR (Nies)—A combination of sepia, old gold, and yellow, giving us a flower unusual and especially beautiful as a cut flower whose beauty is enhanced by artificial light. 6 ft. -- **\$0.75**

CHEROKEE CHIEF (Nies)—A velvety, deep brown iris with rich yellow signal patch on the flaring falls, which intensifies the rich brown color. Large flowers on tall stems.----- **Each \$7.50**

DR. ANNIE BESANT—A very large and tall variety. Flowers are cream with a lovely gold splotch on falls. Used extensively in florist's arrangements. 60 in. ----- **Each \$1.00**

DUTCH DEFIANCE (Nies) A.M., 1949—A very large, bold, hardy blue flower that has attracted much favorable attention. Splendid in form, finish and substance, its charm is enhanced by a yellow signal patch on the frilled falls. 3 ft. ----- **Each \$3.00**

FIFTH SYMPHONY (Nies)—A very decorative *spuria* of deep yellow veined with a golden brown throughout, creating an almost orange effect. Fine for flower arrangements. ---- **Each \$1.00**

GOLD NUGGET (Milliken) — A free flowering bright yellow which has become very popular. The flower stalks have three to four clusters of buds and flowers, each cluster containing two or three flowers. 4 ft. ----- **Each \$1.00**

MICHIGAN STATE (Nies) — A huge bronze flower of a beautiful round form. A loose veining over both standards and falls produce the light bronze effect. 40 inches. ----- **Each \$1.00**

MONNIERE—A soft yellow. The flowers have rather broad petals and are of smooth texture. Fine for cutting. 3 ft. ----- **Each \$0.75**

MT. WILSON (Milliken)—A blue Spuria which makes an excellent variety to plant with some of the yellows, such as Monnieri or Gold Nugget. 3 ft. **Each \$1.00**

PASTORAL (Nies)—A corsage flower. The flaring falls are orange yellow, edged with pale lavender while the erect standards are yellow changing to lavender. The light lavender styles with their deep lavender crests add a finishing touch. 32 inches. ---- **Each \$2.00**

RUSSET FLAME (Nies) H.M., 1950—A vigorous, free flowering Spuria of rich russet coloring which makes it especially useful as a cut flower. The under-

color is deep yellow, the falls as being heavily bordered with dark brown while the standards are washed to a brownish yellow. Heavy substance and good keeping quality make it valuable to florists and home gardeners. Vigorous grower and increaser. 3½ ft. **Each \$1.00**

SAUGATUCK (Nies)—A symphony of color. The standards are lavender shading to yellow at the base; the falls yellow, veined with bronze and broadly bordered with lavender. 4 ft. -- **\$0.75**

SUNNY DAY (Sass) — An excellent bright yellow which is very popular. 3. ft. ----- **Each \$0.75**

WADI ZEM ZEM (Milliken)—A beautiful large cream colored Spuria. The rounded spreading falls are two inches or more in width. The standards are erect and open. One hundred plants of this variety made the long journey by air to South Africa this past fall, they will be grown to supply the cut flower trade in that far off land. 4 ft. --**Each \$3.50**

WHITE HERON (Milliken)—Whiter in appearance than any spuria to date. Some yellow on inner portion of flower. A pure white spuria is a goal not yet achieved. A very large flower on 4 ft. stems. ----- **Each \$4.00**

MISCELLANEOUS IRIS SPECIES

CRISTATA (Evansia)—Delightful little crested iris of light blue and gold. Sun or semi-shade. 4 inches. -- **Each \$0.50**

Iris Cristata

DICHOTOMA—Only member of the Pardonopsis Section. The flowers are comparatively small but they bloom profusely on branched 3 foot stems for many weeks in August and September. Color varies from pale to deep lavender. Easy in any soil. ----- **Each \$0.50**

PALTEC—10 in. From the roof iris, pure pale blue. A border iris. **Each \$0.50**

PESHAWAR—This glowing rich brown purple is such a color gem and so perfect in garden performance that it deserves as high rank in this class as *Elmohr* in the tall class. ---- **Each \$0.50**

PSEUDACORUS—Bright yellow species with splendid foliage similar to Japanese varieties. Thrives in boggy locations. 36 inches. ----- **Each \$0.35**

RETICULATA—The type is brilliant dark purple with orange crests. All of the *reticulatas* are like the Dutch Iris in miniature. 4 inches. **3 for .50; 12 for \$1.75.**

HOSTAS OR PLANTAIN LILIES

The Hostas are excellent for edging borders, mass planting or in front of shrubbery. If you have a shady spot under trees that seems devoid of interest, then by all means try some of these interesting plants for they are at their best grown in such a location where their large sturdy leaves seem almost tropical in growth and very decorative. The racemes of bell like flowers of lilac, blue lavender, and white rise well above the foliage.

Shipment Early Spring or Early Fall

CAERULEA—The true variety has the bluest flowers of any of the Hostas. It is the next largest in size of flower to *H. Plantaginea* with very round puffed out bells of lavender blue distinctly penciled on the inner surface with deeper color. The leaves are glossy green of large size and graceful form. Use for border planting with pale yellow *Hemerocallis* in the background. July-August. 3 ft. ----- **Each \$0.50**

HOSTA DECORATA—The blunt plantain-lily has blunt dark green leaves with white edges. The leaves are about one foot high and the blade about five inches by three inches. In a couple of years a small plant makes a rosette of leaves two feet across. This rosette of leaves of green and white coloring forms an excellent end for a flower bed against a lawn as the outer leaves bend to the ground. The flowers, in the early part of August, are fat bells standing out at right angles on a two-foot stalk. The blossoms of purple have lines of white, so that the effect is not a solid color. There is a sturdy, substantial feeling to this plant. Formerly listed as *Thomas Hogg*. ----- **Each \$0.75**

ERROMENA — This Hosta has been identified through illustrations and description in "Bailey Herbarum" as *Hosta Erromena*. Listed and sold also under names *Japonica* and *Lancifolia Uundulata*. It is a robust growing plant with dark green leaves with prominent curved veins either side of midrib, blade of leaf about 8 to 10 inches long, about 4 inches broad. Flowers, pale lilac bells on stalks 2½ feet tall, blooms in July. ----- **Each \$0.75**

FORTUNEI—A very fine outstanding species with good size glaucous leaves. Makes a fine specimen plant. Foliage not quite as large and more pointed than *Seiboldiana*. Lavender blue bell shaped flowers on stems 2 ft. or more in July. ----- **Each \$0.75**

HOSTA HONEYBELLS—A very new introduction by Bristol. A new hybrid hosta with 1½ in. trumpet shaped flowers of soft lilac with white under coat blue pin stripes on 2½ ft. stalks. Large glossy leaves. Very fragrant. July-Aug. ----- **Each \$1.50**

LANCIFOLIA FORTIS — Lance leaf plantain lily. Long lance like foliage, dark green in color, produced in abundance. Flowers are violet. Bloom September and October on stems two feet tall (very floriferous and especially welcome as it is in bloom over a long period in the fall when flowers are scarce). ----- **Each \$0.45**

LANCIOLIA ALBO-MARGINATA — The narrow leaved plantain lily is very rapid grower. The slim light green leaves have a white line along the edges of the narrow blades. The leaves are about eight to twelve inches long. Lavender, bell shaped flowers, with white lines. Two foot stalks blooming in the middle of Aug. Mature plants are bushy and bloom freely. ----- **Each \$0.50**

SUBCORDATA GRANDIFLORA —Also listed as Plantaginea. Large yellowish green leaves on long stems. Largest blooms of all Hosta. Pure white, lily-like in form. In bloom August-September. 24 inches. ----- Each \$0.60

UNDULATA VARIEGATA—This plant has more white in foliage and leaves are quite wavy. Lovely lavender blossoms in July. ----- Each \$0.50

LANCILOLIA ALBO-MARGINATA

HARDY PERENNIALS

The Perennials listed in this section must be shipped in early spring or early fall. After growth has started they do not ship well so get your order in early.

ACHILLEA ANGEL'S BREATH — Its grows as an inverted bowl, twenty inches high and spreads two feet. In flower, it is so profusely covered that the rich green foliage, decorative otherwise, can scarcely be seen. The white is the purest, and the composition of the flower is fully double without a trace of center. It is brand new and carries our highest recommendation. --- Each \$0.60

***MILLEFOLIUM CRIMSON BEAUTY** —Deep crimson-red. Does not bleach in sun. Fine cutflower, 1½-2 ft., all summer ----- Each \$0.50

***ACHILLEA FILIPENDULA** — Large flat-heads of golden yellow flowers on 3-4 ft stems, which if dried will last all winter. Can be painted any color and is now generally used for Ming-tree gardens. July-September. -- Each \$0.50

***ACHILLEA TOMENTOSA**—A dwarf variety. Large flat-heads of golden yellow flowers on short stems, 3-10 inches. Will serve the same purpose as the above, but flowers are more open or loose with larger spread. June. Each \$0.50

ANTHEMIS

TINCTORIA (Kelway's Variety)—Handsome finely cut foliage, and daisy-like yellow flowers produced all summer. Succeeds well in the poorest soil, excellent for cut flowers. ---- Each \$0.40

ARTEMISIA

SILVER MOUND (Schmidtiana Nana)—A handsome, compact, mound-like plant about 4 inches high and 12 inches in diameter. Foliage fernlike and of the lightest and brightest silvery gray. It makes a very pleasing effect in the rock garden or as an accent plant but it is most distinctive when used for edging beds or walks. Prefers a warm, sunny, dry location. Hardy anywhere. Three, \$1.60; Doz., \$5.00.

HARDY ASTER, each \$0.40

HARRINGTON'S PINK ADORABLE—Produces fine silvery rose flowers in clusters, continuously from early September until cut down by frost

BLUE PLUME—A very choice introduction, valuable for its stately, dignified appearance. The rich, deep purple, nearly double flowers appear on spikes of splendid form.

ASCLEPIAS BUTTERFLY WEED

TUBEROSA—Very showy native plants about 2½ feet high, producing flowers of brilliant orange-scarlet during July and August. Nice for cutting. **Per 10, \$2.00; Per 100, 15.00; Each \$0.50**

ASTIBLE—Astibles are ideal, colorful perennials for shaded locations in the garden. They also do well in the sun but prefer rather rich, moisture retaining soil watering is essential during dry weather. Plants bloom freely in June and July and the foliage remains attractive all summer.

EDICA—36 in. Large trusses of salmon-pink. ----- **Each \$1.00**

FANAL—Lovely plants with bronzy-green foliage and feathery plumes of glowing dark garnet-red. -- **Each \$0.75**

FEUR—Feathery plumes of bright red, very new. ----- **Each \$1.00**

GLORIA—Feathery plumes of glowing deep toned pink. ----- **Each \$0.75**

KOBLENZ—15 in. Soft, feathery plumes of bright rose-pink over excellent bright green foliage. ----- **Each \$1.00**

PEACH BLOSSOM—Feathery plumes of delicate peach-toned pink. **Each \$0.75**

QUEEN OF HOLLAND—Feathery white flowers with fern-like foliage. **Each \$1.00**

BLEEDING HEART (Old Fashioned)—A favorite in Grandmother's garden half a century ago, it is equally popular today. Grows 2 feet tall. Thrives in partial shade, but will grow in full sun. Attractive foliage. Graceful heartshaped pink flowers in April-May. The plant becomes larger, more beautiful, each passing year. ----- **Each \$0.75**

BLEEDING HEART, FERN LEAF (Eximia)—Lovely pink flowers are produced continuously from late spring right through summer into fall. Fern-like foliage is very attractive. Grows a foot tall in sun or shade. Hardy, easy to grow. Fine border plant. **Each \$0.50**

BLEEDING HEART (Bountiful) — This is a very new **DICENTRA HYBRID**, remarkable in a robust way. Resembles **DICENTRA EXIMIA** but is vastly superior. An established clump attains a width of 18 inches, 10 inches tall with as many as 30 to 40 very sturdy bloom stems appearing in May and lasting well into Aug. The foliage is a healthy dark blue-green. Reflowers in Autumn. Prefers sun to shade in a well drained location and is perfectly hardy.

----- **Each \$1.50**

Resents spring transplanting so must be delivered in fall.

CASSIA

MARYLANDICA — Handsome pinnate foliage, profusion of yellow racemes during July and August, simple culture for the most difficult of locations.

----- **Each \$0.50**

Shipment—May or September

AGLAYA—A magnificent, large, fluffy, fully double Shasta Daisy whose glistening narrow white petals produce a fluffy, pompadour-like flower. After the main crop of blooms, this hardiest of all double Shastas continues to bring forth flowers throughout the entire season. Long lasting flowers are superb for indoor arrangements. -- **Each \$0.75**

WIRRAL PRIDE—An English introduction of very compact growth. The high yellow center is a contrast to the glistening white petals. 2½ to 3 feet tall, flowers in June. It has withstood weather of 14° below. ----- **Each \$0.75**

COREOPSIS

A useful and attractive herbaceous perennial, both for border and cut flowers. They are of easy culture and produce their golden yellow flowers in profusion throughout the summer.

DOUBLE SUNBURST—Here is a Coreopsis which is different, producing striking yellow flowers which are actually double and of good size. They attract a great deal of attention and are also elegant cut flowers, noted for their keeping qualities. They grow to a height of 24 to 30 inches. ----- **Each \$0.40**

HELIOPSIS

INCOMPARABILIS SUMMER GOLD—A greatly improved form which should do much to increase the popularity of this easily grown plant. During July and August, when cut-flower material is not plentiful, it produces large, almost double flowers of rich golden color, on strong branching stems. -- **Each \$0.40**

HEUCHERA CORAL BELLS

BREZOIDES—Profuse bloomer. Pink. 1½-2 ft. All summer. ---- **Each \$0.50**

INCARVILLEA—Trumpet flower.

DELAVAYI — Rose-pink flowers produced in large trusses on stiff, 18-inch stems. ----- **Each \$0.60**

LIATRIS (Gayfeather)

This fine spire-like perennial blooms in midsummer. It is showy in the garden and excellent for cutting. Grows easily in common garden soil in full sun or part shade.

ELEGANS—A beautiful and distinct species. Each individual blossom is large and starry, pure lavender with white centers. Long curved stamens giving an airy effect. ----- **Each \$0.75**

PUNCTATA LONGIFOLIA — Dense spikes of purple florets. ---- **Each \$0.40**

PYCONSTCHYA—4 ft. The tall spikes of rich purple are outstanding in the summer garden. July-Aug. **Each \$0.35**

SCARIOSA (Alba)—Interrupted florets of white on tall spikes. ---- **Each \$0.50**

SCARIOSA (August Glory)—An Aug. blooming Scariosa. ----- **Each \$0.40**

SCARIOSA (Giant spikes of interrupted florets of rosy purple. ---- **Each \$0.40**

LIRIOPE (Border plant)—Will grow in shade or sun, blooms are deeper in the shade, makes a permanent border and holds soil when established. **Each. \$0.50**

LYTHRUM

PURPLE LOOSESTRIFE

ROSALIE—The brightest pink variety. This is medium tall, has an all summer flowering period. Carries highest recommendation.

ROSEUM SUPERBUM—Deep rose, four feet tall, floriferous. Particularly useful in extremely wet location. Sun or shade.

SUPERBUM (The Beacon)—Excellent for moist or wet locations. An English introduction of merit. 12 or more 3 ft. spikes of clear rosy-red. Very good for cutting. -- **Each \$0.50. All three, \$1.25**

MERTENSIA - Virginia Cowslip; Blue Bells—All are medium growth, and well suited for shady or partially shady borders. Mostly blue or white-flowered. The only one we really recommend is *Mertensia virginica*.

CULTURE—All will succeed in ordinary soil. A shady or partially shady position is desirable; lovely planted in open woodlands together with daffodils. Plant in autumn or very early spring, 6 to 8 inches apart.

VIRGINICA—An early spring-flowering plant, growing about 1 to 1½ feet high with blue flowers fading to pink; one of the most interesting of our native spring flowers. ----- **Each \$0.50**

PENSTEMON, ROSE ELF—We consider this one of the very best new perennials. A healthy, husky grower it is entirely hardy with us. Plant it in a sunny spot and it becomes more beautiful each passing year. In June and July the graceful spikes, 2 to 3 feet tall are just full of the lovely coral-pink flowers. Fine for cutting and a show-place in the garden. ----- **Each \$0.60**

SIR JOHN FALSTAF (Another English Triumph)—A giant among Phlox and unquestionably the most outstanding variety we have seen. It is so far in advance of all others that we predict it will retain the lead for a very long time to come. Color is a rich luminous salmon-pink, one of the loveliest colors in the floral pageant of summer. Individual "pips" are larger than a five-shilling piece, about 1½ inches in diameter. The flower truss is truly massive—there is no other Phlox comparable in size. Sir John Falstaff has a first-class habit and a constitution as befits the name—robust, vigorous, with sturdy stems and bold substantial foliage. And as to growth—it is one of the most accommodating we know. Height 24 to 36 inches depending on soil conditions. ----- **Each \$0.75**

WHITE ADMIRAL—Beautiful big heads of bloom like great mounds of snow. Here is a brand-new white Phlox guaranteed to bring more beauty to your garden. It produces enormous pure white heads and the continually breaking side branches give an excellent late bloom. Reaches a height of 2 to 2½ ft. and blooms profusely in July and August. It is delightfully fragrant. **Each \$0.65**

PHYSOSTEGIA

FALSE DRAGONHEAD

\$0.50 each or all three for \$1.25

GRANDIFLORA ROSY SPIRE—Grows from 18-24 inches with large heads of bright violet mauve flowers. Very desirable for cutting.

Per 10, \$2.00; Per 100, \$15.00

GRANDIFLORA VIVID, TALL TYPE—Similar in color to the well-known Grandiflora Vivid, except that this variety grows to height of 30 inches. The flower spikes are also larger and the color a little more striking. It continues to bloom throughout the entire months of July and August.

Per 10, \$2.00; Per 100, \$15.00

SUMMER SNOW—In all its characteristics, it resembles the medium tall Rosy Spire. Flowers are glistening pure white and admirably suited to cutting.

PLATYCODON (Balloon-Flower)

Dependable, hardy plants giving a wealth of bloom for a long time during the summer, when color is most needed in the garden. They will do fairly well in part shade.

3 Outstanding New Balloon-Flowers

NEW SHELL-PINK—18 in. Distinctive pale pink flowers. Blooms freely all summer.

DOUBLE WHITE — Beautiful double blooms on 18 to 24-inch plants. Excellent for cut flowers and for garden decoration.

DOUBLE BLUE—A good companion for Double White.

Each \$0.50! all three \$1.25

SPIRAEA - Goat's Beard; Meadow Sweet—Very handsome herbaceous perennials. The species named below have handsomely divided leaves and flowers borne in graceful, feathery plumes.

Culture.—The Spiraeas require a deep, rich moist soil. Plenty of leaf mold and well-decayed manure must be incorporated with it before planting. They will thrive in shady, moist borders, or they may be grown by the waterside. Filipendula flore-pleno, being small, should be grown in groups of three or six plants. Plant in autumn or early spring, 12 inches apart.

FILIPENDULA—Lovely single white flowers on 12 inch stems. Beautiful fern like foliage that stays green the year around. Blooms in June and July.

TRITOMA

RED HOT POKER

GOLDMINE—Its bold burnished and golden yellow flowers are profusely produced from July until stopped by frost. Everyone who sees a clump of Goldmine in bloom enthuses about its impressive beauty. It is a really fine plant, and should be in every garden where its stateliness and fine color will make it one of the most outstanding subjects. Grows about three feet high with often 10 or more spikes at one time. **Each \$0.75**

PFITZERI—The rich orange flowers are always in big demand on the cut flower markets. If grown in fairly rich soil, a plant will produce several first class quality flowers. Tritomas should be included in every planting of summer cut flowers. ----- **Each \$0.75**

PRIMROSE BEAUTY—The beautiful spotless primrose-yellow spikes produced by this plant are unique for their grace as well as their delightful color. They are faultlessly shaped and slightly arch-

ed, creating a charming effect. Primrose Beauty blooms in early summer, June and July. ----- **Each \$0.75**

VERONICA, LONG. SUB. (Speedwell)
—Here is a fine perennial that should be in every flower garden. It is one of the handsomest blue-flowering plants.

HARDY GARDEN LILIES

Fall Delivery

All bulbs are top size and sure to bloom.
Culture.—All lillies must have well drained locations and prefer sun to shade. They resent being disturbed, so plant them in permanent locations.

CREELMAN HYBRID REGAL —
This is a new hybrid variety. The flowers are like the Regal but they are much larger and even more beautiful. Just as hardy and easy to grow. Blooms even more freely and grows a foot or so taller. Great clusters of flowers in June-July that will astonish you. Fragrant glistening white with golden throat and tinged ruby-pink on the outside. Plant 7 to 8 inches deep in well-drained soil, in full sun or part shade. **Each \$0.60; 12 for \$6.00**

REGALE—Top size bulbs: **Each \$0.50; 12 for \$5.00.** No flower garden should be without this extremely hardy lily which is of easiest culture. Large, beautiful white with yellow center and exterior tinted purple or brown. Ours is a selected strain producing extra large flowers with wile petals. Largest bulbs produce 30 to 40 flowers on stems 6 to 8 feet high. Splendid planted with blue Delphiniums.

SPECIOSUM RUBRUM (Magnificum)—
Flowers of light pink spotted and marked crimson. Height, 2½-3 feet. August, September. ---- **Each \$0.75; 12 for \$7.50**
